
Skyles Electric Works

Autumn 1986 Catalogue

Being the TENTH EDITION of the first catalogue devoted exclusively to Commodore Owners Everywhere...

...in which we extend most of last fall's sale prices, offer some new bargains, and introduce our first AMIGA products. In the next 16 pages we will introduce many new products for Commodore computers and list our Autumn Sale prices. **All Autumn Sale prices are good through December 22, 1986.**

262-K AMIGA™ MEMORY

It all began 8 years ago...
when Commodore produced a wondrous PET Computer with 8 Kbytes of memory. Skyles Electric Works then offered to double the PET memory with an 8 Kbyte memory addition.

History repeats itself 7 years later...
when Commodore produces a wondrous new AMIGA (latinized version of the word PET?) with 262 Kbytes of memory. Once again Skyles Electric Works responds to the challenge, and offers to double the AMIGA memory with a 262 Kbyte memory expansion.

At 1/2 the price of the original...
PET memory expansion, Skyles Electric Works now offers 32 times the memory. That's right!! 262 Kbytes of AMIGA memory expansion for only $69.95*. The lowest priced memory expansion for the AMIGA that we know of.

A 2-year parts and labor warranty...
was furnished with every Skyles Electric Works PET memory expansion. A lot of people ask "Will you be around for 2 years?" Yes!! we have been around for almost 8 years. We are still offering a 2-year parts and labor limited warranty with every memory we make.

How is this possible?...
Skyles Electric Works has proven that buying the best parts, testing, manufacturing to the highest standards, and testing, produces a memory that lasts almost forever.

Buy your 262 Kbyte AMIGA memory expansion...
from Skyles Electric Works at the lowest price from the most reliable and most proven Commodore expansion memory builder in the world.

262-K Memory for AMIGA	**$69.95**

MEGABYTES/AMIGA

Coming soon from Skyles Electric Works
We had so much fun developing the 262-K Memory for Amiga that we decided to develop 1.05 Mbyte, 2.10 Mbyte, 4.19 Mbyte, 6.29 Mbyte and 8.39 Mbyte Memories for Amiga. Consider, 1,048,576 or 2,097,152 bytes of memory designed to plug directly into the right side of the Amiga. All Memory boards have auto-config and 86 pin pass through. From 8192 byte memory boards to 8,383,608 byte on four memory boards in less than 8 years. Over a thousand times increase in memory capacity at about a ten times increase in price, fantastic.
We expect first deliveries to occur in November. Contact us for more details and a place on the waiting list.

	AUTUMN SALE
1.05 Megabyte Memory	**$599.95***
2.10 Megabyte Memory	**$999.95***

MIDI for AMIGA

A Standard MIDI IN, 2 MIDI OUT, and MIDI THRU Interface
for the Amiga Computer. Plug it into the RS-232 Port on the rear of your Amiga and you are ready to use Musical Instrument Digital Interface (MIDI) instruments and devices with your Amiga. Designed to be used with standard MIDI cables and all the presently available Amiga MIDI software. The **MIDI for Amiga** Interface gets the job done.

The Price is right	AUTUMN SALE
MIDI for Amiga Interface	**$49.95***

CLOCK for AMIGA

We were shocked when we discovered
that the otherwise friendly Amiga "would not even give us the time of day." We immediately set about fixing the problem with Clock for Amiga. No longer is it necessary to set the clock via Preferences. With **Clock for Amiga** you can have the time of day set automatically each time you turn on your Amiga. **Clock for Amiga** is a small cartridge that plugs onto the side of your Amiga. **Clock for Amiga** runs for two years even if your Amiga is turned off. Get **Clock for Amiga** today and let your Amiga be an amiga.

The Price is right	AUTUMN SALE
Clock for Amiga	**$69.95***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

Autumn Sale Extended to December 22, 1986!

SWIFT 128

The affordable, professional SPREADSHEET SYSTEM for the Commodore 128, will prove invaluable in business, homes, and clubs. Use Swift 128 to construct models of income and expenditure; for carrying out instant "what if" calculations to see how a change in one or more figures, affects all the other figures; or for scientific applications, where complex number crunching is required.

A Vast Spreadsheet Area With POP-UP menus

Swift 128 operates in the C-128 80 column mode and uses all the memory of the C-128 to offer a vast spreadsheet area of over 16,000 cells in a 254 row by 64 column matrix. Swift 128 is unique in that it is operated by pop-up menus, a system pioneered by the Swift 128 authors. No longer do you have to memorize a whole vast array of commands and control keys. The menus appear when you want them and disappear when you don't.

Amazing features

1) Vast spreadsheet area—Over 16,000 cells.
2) Vast matrix—254 rows by 64 columns.
3) Vast working memory—allows more complex worksheets.
4) Flexible cell formatting—variable cell widths, user definable numerical precision, and text formatting to left, right, and center.
5) Split Screen—Simultaneous display of two areas.
6) Easy interface to parallel printers.
7) Automatic execution of pre-programmed sequences.
8) Graphical display—Converts cell values to graphs.

Swift 128 C-128, disk	**$49.95***

dfile 128

database management system with an excellent beginners manual and a low, low price. This is the database for the first time database user. dfile 128 features include:

1) Fast—All records held in memory.
2) Flexible—Number and length of fields.
3) Field length—To 160 characters, upper and lower case.
4) Records—With punctuation including commas.
5) Sorting—By one or two fields.
6) Selection—For printing by logical operators.
7) Printing—To Screen, CCommodore, or ASCII printers.
8) Mailing Labels—Up to four across.
9) Reports—Formatted, 16 columns, 136 characters/line.
10) Calculated Reports—Three equations per column.
11) Columns—Totals, average, justified right, left, dec.

QUICKSILVER 128

QUICKSILVER 128 our premier IEEE-488 Interface

for the Commodore 128 is now in stock and even better than we had planned. Quicksilver 128 offers an IEEE Interface for the Commodore 128 in the C-128 mode (40 or 80 columns) and in the C-64 mode as well. We still do all the amazing things revealed on page 4 of the Fall Catalog. QUICKSILVER 128 will inter-connect your Commodore 128 to Commodore SFD 1001, 2031, 2040, 3040, 4040, 8050, 8250, 9060, and 9090 Disk Drives. QUICKSILVER 128 will connect your Commodore 128 to Commodore 2022, 2023, 4022, and 4023 Printers.

The Price is right	FALL SALE
QUICKSILVER 128 C-128	**$119.95***

IEEE Flash! 64

IEEE Flash! 64 our premier IEEE-488 Interface

for the Commodore 64 is now in stock and even more transparent (program compatible) than QUICKSILVER 64. It does all the other amaging things revealed on page 4 of the Fall Catalog. IEEE Flash! 64 will inter-connect your Commoddore 64 to Commodore SFD 1001, 2031, 2040, 3040, 4040, 8050, 8250, 9060, and 9090 Disk Drives.. IEEE Flash! 64 will connect your Commodore 64 to Commodore 2022, 2023, 4022, and 4023 Printers.

The Price is right	FALL SALE
IEEE Flash! 64 C-64	**$99.95***

INTERPOD for 64

Is a Cheap, Slow, and almost totally Transparent IEEE-488

Interface for the C-64. It also has a **"RS232" Printer interface.** It connects to the serial port of the C-64 and does not operate any faster than a serial device. It does not work with C-128. It requires a PET-IEEE or an IEEE-IEEE cable to connect to the IEEE device. We only have a few **Interpods** left, we have reduced the price to clear them out.

The Price is really right	FALL SALE
Interpod 64 C-64	**$49.95***

Do you have friends or even relatives who would like their own personal copy of this catalogue? Call 1-800-227-9998 and we will be delighted to send one directly to them.

IMPORTANT: Please use a separate sheet of paper for any inquiries or correspondence not related to this order.

FALL SALE orders must be postmarked prior to November 22nd.

How to Order

ORDER BY MAIL. You may use the Order Form enclosed in this catalogue or write a personal letter giving product name, model number and quantity.

ORDER BY TELEPHONE—TOLL FREE—Any time—9 hours a day—5 days a week. Use our toll-free number **1-800-227-9998** for your Skyles Electric Works catalogue orders chargeable to your MasterCard or VISA card.

TERMS are payment with order. Please include your check, bank draft money order or use your MasterCard or VISA on orders over $50.00. Sorry we do not accept C.O.D. orders.

SHIPPING TIME. We will process your order immediately upon receipt. We normally ship priority mail or UPS. If we cannot ship within 7 days we will notify you of the expected delay. Your order should reach you in less than 10 days.

CUSTOMER SERVICE. For inquiries and other customer service calls, our telephone number is **1-415-965-1735**. Please telephone between the hours of 9:00 AM and 6:00 PM Pacific Time, Monday through Friday.

INTERNATIONAL ORDERS. Send United States funds for merchandise plus $15.00 for shipping.

PRICES in this catalogue are effective October 15, 1985 and subject to change without notice.

Save time—use our toll-free telephone number 1-800-227-9998

We are pleased to offer you our toll-free telephone number for quick and easy ordering. Just one call, any time of the day, lets you place an order, get information on model numbers and gives us special shipping instructions. And we will be able to get your order to you just that much sooner. Just dial **1-800-227-9998** from anyplace in the U.S. except Alaska or California. From Alaska or within the State of California call **1-415-965-1735**, and to help pay phone charges, we will give you $1.00 off each telephone order that you place.

Explore the Electronic Universe

Over 10 million people have access to personal computers. Now you can have access to this electronic universe through your **Commodore 64** or **Commodore 128** computer. There are approximately 1500 computerized information sources in the electronic universe. One shopping service claims that they have over 50,000 items available for purchase through the electronic universe. There is an uncounted number of bulletin boards in the electronic universe.

And it is inexpensive, in fact in many cases, it is free. To begin you need to buy a modem.

Need a Modem?

Get a BUSIMODEM 300™

from Skyles Electric Works. **BUSIMODEM** is a full function 300 baud autodial modem found after searching the four corners of the world. A perfect companion to **BUSITERM** offered across, **BUSIMODEM** offers the added feature of being permanently attached to your telephone. No more fumbling with handset cord and plug after dialing the access number and waiting for the tone. With **BUSIMODEM** you let your computer do the dialing to your favorite host computer, database, bulletin board, or friend. And all for an amazing low price made even lower with our **BUSITERM-BUSIMODEM** package.

Get a BUSIMODEM-1200™

A high speed modem offering both 300 and 1200 baud transmission rates. Meets Bell 212A and 103 transmission standards. Auto dial and auto answer, with auto detect and select are but a few of the many features offered by **BUSIMODEM-1200.** A user port connector and 5′ cable completes the package. A perfect high speed companion to Busiterm and your C-64 or C-128 computer.

		FALL SALE
Busimodem-300, C-64, C-128	$ 99.95	49.95*
Busimodem-300/BUSITERM Combo, C-64, C-128	129.95	69.95*
Busimodem-1200, C-64, C-128	249.95	199.95*
Busimodem-1200/BUSITERM Combo, C-64, C-128	279.95	219.95*

C-64 or C-128

Reach Out And Touch A Computer . . .

and let a **BUSITERM**™ cartridge do the dialing. With a **BUSITERM** cartridge furnishing the terminal program you can lean back, relax, and enjoy the world of telecommunications.

Using **BUSITERM** is as easy as one, two, three: Turn on your **Commodore 64** and press "1" and set the time, press "2" and dial your favorite computer friend, data base, bulletin board (the **BUSITERM** demo package gives you free access to CompuServe's Consumer or Executive menus); press "3" and you are on-line. The remaining numbers give the ability to transfer programs, datafiles, save programs or datafiles to the disk or print them out on the printer. **BUSITERM** will vow the most experienced telecommunicator. And all at an amazing low price.

The Thinking Terminal

SIXTH SENSE™ is an automatic modem manager. You can tell it to originate and answer phone calls with complete dialogues even when you're not at your computer. You can instruct directly or you can use the templates provided on the program disk. You will find that **SIXTH SENSE** is a whole new way to use modems.

		FALL SALE
SIXTH SENSE, C-64, Disk, Modem	$89.95	79.95*

COMMUNICATIONS — UTILITIES

4 Excellent Utility Programs for C-64

Disk Revealed™

Disk Revealed is an amazingly good disk file editor program for recovering crashed disks. Works with ***1541 FLASH!*** on the **C-64.** Read, modify, and write to selected disk sectors. An excellent program that is very popular in England, where it was first developed.

		FALL SALE
Disk Revealed, C-64	$49.95	29.95*

Supersort™

Supersort from Supersoft of England is a very nice sort utility that may be used alone or incorporated into your programs. Written in machine language, with a modern sort algorithm, for maximum flexibility and speed. An ideal addition to your **C-64** programming utility kit.

COMMODORE 128 COMPATIBLE

		FALL SALE
Supersort, C-64	$49.95	29.95*

TD™

TD is a small but invaluable aid to **C-64** machine language programmers who use MIKRO and Victree. **TD** allows the full power of Victree to be applied to editing and writing machine language programs. **TD** then transforms the program into a form that is completely compatible with the MICRO assembler.

		FALL SALE
TD, C-64 MICRO Victree	$49.95	29.95*

STP™

STP is a machine language Step-wise Executor. Originally written as a single step executor of machine code, it grew into a modest debugger. **STP** contains some excellent features including: current register display, the top ten bytes in the stack, current instruction display, and breakpoints.

		FALL SALE
STP, C-64 MIKRO Victree	$49.95	29.95*

VIDEO DIGITIZER

NOW AVAILABLE FROM SKYLES ELECTRIC WORKS

Le Digitizer™

Just Plug In

A compact module that plugs into the cartridge port of the **C-64** or **C-128.** Any standard video camera, black and white or color plugs into the top of the module. In fact any standard video output from such devices as video recorders, TV sets, video disk players, satellite TV, and satellite weather systems may be plugged into the **Video Digitizer.**

Just Load

An accompanying diskette containing programs to:

- Digitize a 256 by 256 pixel picture in 4 shades of gray.
- Scan the picture across (only 160 by 200 shown on the screen).
- Replace grey shades with colors.
- Save complete 256 by 256 pixel picture.
- Save 160 by 200 screen in Koala format.
- Load and view previously saved pictures.
- Automatic slide show of Koala format pictures.
- Compare two pictures and report number of differences.
- Printout pictures on Commodore 1515, 1525, 801, 802, 803, 1526.
- Printout on Epson, StarMicronix, and compatible printers.
- Printout on Canon 1210, Okimate 20, and GP-700A.
- Direct printout of 16 shades of grey or false color.

And Enjoy

A whole new world of potential uses of the **C-64** and **C-128** are opened up by the addition of a video digitizer. Send pictures to friends, anywhere in the world, using Busimodem (see page 10). Automatic part and assembly inspection, robotics, artificial intelligence and recognition experiments, surveillance, and of course the whole spectrum of artistic endeavors including video art are but a few of the many uses.

At a Low Cost

The **Video Digitizer** is available immediately from Skyles Electric Works. The price is amazingly low.

		FALL SALE
Video Digitizer, C-64/C-128	**$179.95**	**149.95***

Le Plume™

is much more than a pen. **Le Plume,** a disk based artist's program for the **Commodore 64**, converts your joystick into a pen, a pencil, and a calligraphy brush. **Le Plume** makes your **Commodore 64** screen a highly versatile artist's tablet.

Draws lines, rectangles, circles, arcs, and place points rapidly and easily with **Le Plume.** Flip your picture, select your tablet and paint color, and then reverse them with a couple of keystrokes. Fill in your solid objects, zoom in on any part of your picture for detailed changes, adjust your brush width and angle. These are just a few of the readily available features of **Le Plume.** And of course save your pictures for later recall. All at an amazingly low price.

		FALL SALE
Le Plume C-64, Joystick	**$29.95**	**19.95***

COMMODORE 128 COMPATIBLE

GRAPHICS

Le Tablet

It's SUPER SKETCH™

SUPER SKETCH from Personal Peripherals, is an advanced sketch pad for artists of all ages. A truly remarkable piece of hardware supplemented by a diskette to give you and your **Commodore 64** all the tools needed to become a great artist. Sketch pictures, trace pictures, paint pictures, save the results to your disk or tape, print out the masterpiece on your printer. The included Graphics Master™ disk contains all the programs necessary to trace, sketch, paint, save results, and print out to Commodore MPS 801, or 1525 printers or the Ergo Hush 80CPI printer (see page 4). An optional **Printer Utility**™ disk handles most other printers that have graphics capabilities.

		FALL SALE
Super Sketch, C-64, disk	**$49.95**	**29.95***
Printer Utility, C-64, printer	**39.95**	**24.95***

COMMODORE 128 COMPATIBLE

High-Res with Graphix 64™

Remember the old PET/CBM™ graphics board? It cost about $300 and did about the same as what the new **GRAPHIX-64** program does.

On disk or tape for $19.95, the **GRAPHIX-64** gives you high-resolution dot graphics by controlling the **Commodore 64's** array of 320 × 200 dots. That is a total of 64,000 individual dots, each of which can be turned on or off and color selected. **GRAPHIX-64** lets you draw lines, boxes, any variety of figures. You can easily plot points using the bottom left-hand corner of the screen as the point of origin. Draw graphs and charts. Use your **Commodore 64** and its monitor as the canvas for your electronic art! A window command lets you display part of the high-resolution screen and part of the normal screen at the same time.

GRAPHIX-64, C-64, Disk or Tape **$19.95***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

Sound and Music

Music to the ears of C-64 users

Music Maker™ is a 24 note plastic keyboard overlay for your **C-64.** No electronic connection, but we do provide keyboard stickers for those that are unfamiliar with musical notation. The **Music Maker,** together with the software diskette, users guide, and comprehensive tutor book are all you need to transform the C-64 to a versatile electronic synthesizer.

Have it your way

Music Maker will play preprogrammed songs, or you can compose your own, using preprogrammed accompaniments. An endless variety of sound and music is available by modifying the octave range, rhythm combinations, bass pattern, filters, and voices are all available from easy to use screen menus.

Features

Music Maker features include: eight preset sounds, sound creation via waveshape, ASDR, and filtering, six octave range, two octave clip on keyboard for C-64, three preset rhythms which can be combined with two selectable bass sounds, SAVEing and LOADing of compositions, and pitchbend and fine tune. All at an amazing low price!

		FALL SALE
Music Maker, C-64 Disk	**$49.95**	**39.95***

MICROVOX™

MICROVOX Digital Sound Editor is Bob's latest discovery from the English musical scene. Praised by some of the most innovative pop musicians in England, we expect **MICROVOX** to take the American computer-synthesizer world by storm. Well, maybe not quite as big a hit as the Beatles, but we have our hopes.

MICROVOX is a digital audio sampler and sequencer which connects to the **Commodore 64, SX-64,** or **Commodore 128.** **MICROVOX** can be controlled by MIDI standard devices. The superb sound reproduction owes much to the careful design of the hardware. Even more outstanding is the excellent software written by the talented musician and programmer, Andrew Trott, the author of MICRO.

MICROVOX's main features are:

- 8 sampling rates with a maximum of 42kHz, for 20kHz bandwidth.
- 1 to 16 seconds per sample with up to 16 samples in C-64 memory.
- Internal or external, including MIDI, triggered sampling.
- Extensive menu driven, on screen, editing capabilities.
- Hi-res screen display, including recording level indicator.
- 2000 note sequencer, standard, with 8 external device triggers.
- Output over a four octave range.
- Fully flexible digital delay line, with looping, sequencing.
- MIDI interface standard.
- Two 24dB/octave tracking filters eliminates quantization noise.

MICROVOX offers all this at an amazingly low price. Please tell your musical friends.

CREATIVITY

Electronics Hobbyists Attention

Speicher-Scope™ from Austria converts your **Commodore 64** or **Commodore 128** (64 mode) to a storage scope. **Speicher-Scope** consists of a small electronics board that plugs into the user port and a cartridge resident program that plugs into the cartridge port. The electronics board accepts a standard BNC terminated DVM or oscilloscope probe. The auto start cartridge presents you with a complete menu.

You can select time divisions of 1 millisecond to 500 seconds in the standard 1, 2, 5, sequence. You can select to store up to 95 screens with each screen containing 10 time divisions. Positive and negative voltage level triggering, AC/DC coupling, and input voltage ranges of 100 millivolts to 10 volts per division are operator selectable. A most useful addition to the tool kit of an electronic technician, researcher, or serious hobbyist.

		FALL SALE
Speicher-Scope, C-64, C-128	**$149.95**	**129.95***

COMMODORE 128 COMPATIBLE

They laughed until I sat down

to play on my **Commodore 64** with **MUSIC MASTER,**™ a truly comprehensive music synthesizer.

Little did they know that I had used **MUSIC MASTER** to pre-record up to 1500 notes of three voices, that I had made an eclectic selection of rhythms among **MUSIC MASTER's** potpourri of 34 pre-programmed rhythms and that I was using **MUSIC MASTER** to control oscillator 3 of the **Commodore 64** sound chip to produce the vibrato and wah-wah that gave the real time sound.

Tomorrow I'm going to show them games where I have used **MUSIC MASTER** to generate the sounds and record them as subroutines called by my programs. I may never let them know how inexpensive **MUSIC MASTER** is.

		FALL SALE
MUSIC MASTER C-64, Disk	**$49.95**	**34.95***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

Software Integration

NOW AVAILABLE FROM SKYLES ELECTRIC WORKS

Integration is a big word for a very simple idea: sharing information and data among all your programs. On more expensive PC type computers the idea is wrapped in a fancy name and hundreds of dollars charged for the product. Not from Skyles Electric Works. This powerful feature is built into each of the following programs. **Busicalc** planning program spreadsheets can be used directly in reports written with **VIZAWRITER**. Data entered into **BUSICALC, BUSIDATA,** or **VIZAWRITER**, can be transferred to any other of the programs. For example a mailing list selected and sorted by **BUSIDATA** used to write a series of personalized letters by **VIZAWRITER**. The possibilities are almost endless. And at NO EXTRA COST.

BUSICALC 3™

For the ultimate in electronic spreadsheet programs for your **Commodore 64**, look to the **BUSICALC 3.** It has all the features of **BUSICALC 2** plus it has a 3-dimensional spreadsheet. It can retrieve data off of 26 other spreadsheets at one time.

Whereas **BUSICALC 2** is limited in its access to data by the memory in the computer, **BUSICALC 3** reads data off the disk drive. With **BUSICALC 3**, you can reach up to 52,000 boxes (or "cells") of information.

BUSICALC 3 features a new "on the sheet" business bar chart. Now you can graph your more important results for easier understanding without having to leave the spreadsheet.

COMMODORE 128 COMPATIBLE

Other features of **BUSICALC 3** include: easy linking to VIZAWRITER. Chartpak 64, Chartplot 64, Easyscript, Paperclip, BUSIDATA, Flex File via a new "Print file"; Output to all Commodore printers; password file protection; direct printer control.

BUSICALC 3 allows up to 999 rows, 200 columns, and 2500 cells. **BUSICALC 3** comes with a 96 page manual and over a dozen spreadsheet examples and user aid files on the program disk.

This program provides all the power and flexibility a user could ever want in an electronic spreadsheet program.

		FALL SALE
BUSICALC 3, C-64, Disk	**$99.00**	**49.95***

PROFESSIONAL

Word Processing

If you haven't used a word processor yet, you are in for a treat. The days of multiple drafts and endless typing and retyping are over. A word processor can store, move, delete and save virtually any size of text that you can enter. And it can format that text in almost any way that appeals to you.

VIZAWRITER™

COMMODORE 128 COMPATIBLE

When Bob saw the BUSIWRITER™ in England a couple of years ago, he thought it was the best word processing program he'd ever seen for $99.00. He began to produce and sell it.

Well, times have changed. Bob *still* thinks it's the best word processor he's ever seen, but now it's called the **VIZAWRITER**, and now it's only $59.00.

Skyles Electric Works no longer produces the VIZAWRITER program, but we sure will sell it to you.

VIZAWRITER is a full-featured word processing program, the most sophisticated one available for the **Commodore 64**. It has an enormous repertoire of editing and composing (formatting) functions that are comparable to a far more expensive dedicated word processing system. Plus special applications features such as mail merge.

VIZAWRITER lets the user store up to 20 pages of text at once in the computer's memory. It fully uses the Commodore's 64K capacity. Another superb extra feature is its constant output to video and side scrolling, so the user can see what the document looks like at all times. The program has a work page for notes, a header page and a footer page.

VIZAWRITER comes with a thorough 75-page manual that has a quick reference section up front where it is easy to find.

If you are looking for a word processing program for your Commodore 64, stop right now. **VIZAWRITER** is the best.

		FALL SALE
VIZAWRITER, C-64, Disk	**$59.00**	**29.95***

Databases

You probably know that a database lets you organize, analyze, and format groups of information for any number of applications—inventory, mailing lists, gradekeeping, attendance, and bookkeeping to name a few. You use the database to record, sort, select, calculate, and retrieve almost any collection of information.

BUSIDATA™

BUSIDATA features up to 1000 records per 1541 data disk, 2000 records per 1571 data disk, 6000 per SFD-1001 data disk, and over 20,000 records per SEW/JCT-1002 hard disk drive (see page 5). Each record can contain up to 74 characters and 20 fields of up to 79 characters per field. **BUSIDATA** features up to 20 keys and five levels of sorting on these keys. Also featured are easy to use menu driven data selection and handling features, that include RS-232 printer output.

C-64 or C-128

The new **BUSIDATA 128** has the added features of "one time load." Load **BUSIDATA 128** at the beginning of your session and then place your data disk in the disk drive. No disk switching required with a single disk system. No waiting when you go between modules. **BUSIDATA 128** also features "on screen output," a complete review of your report format (up to 80 columns) dynamically on the screen.

		FALL SALE
BUSIDATA 128, C-128 Disk	**$79.95**	**59.95***
BUSIDATA 64, C-64 Disk	**49.95**	**39.95***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

Planning Programs—BUSICALC™

Electronic planning programs allow the user to create a gridsheet, spreadsheet, worksheet, or any other table of information, using the memory of the computer as pencil and paper. The computer display or terminal acts as a window through which the user views the information as it is entered from the computer's keyboard. **BUSICALC** is an electronic planning program written for the whole Commodore computer line.

BUSICALC is fast! We have updated the first **BUSICALC** program to make it lightning fast.

BUSICALC is versatile! With **BUSICALC,** you can: Evaluate sales reports, expense accounts, and overhead costs, analyze inventory, control and estimate project costs, tackle engineering design problems, do tax planning including income, deductions and credits, establish running analyses of stock portfolios, use it for general budgeting—updating price lists, evaluating salary structures, projecting costs, organize your personal accounting, family finances, and bills and expenses, forecast returns on investment, apply **BUSICALC** to insurance analysis, and track cash expenditures.

BUSICALC is easy! You use simple keystroke commands and the numbers that you are already accustomed to working with.

BUSICALC is helpful! By eliminating the tedium of most number crunching operations, **BUSICALC** frees you for more sophisticated decision making.

For the **COMMODORE 64** we offer 2 versions, **BUSICALC 2™** and **BUSICALC3™.**

BUSICALC 2™

BUSICALC 2 has all the features that you can only find in much more expensive programs. It has a total of 17 commands, including, for example:

Formula print-out; "Window framing," a great command that retains row and column headings even as you scroll through a long or wide worksheet; A high-speed "find" capacity for creating parts lists and inventories.

BUSICALC 2 has 26 built-in math and logic functions and 3 user defined functions.

BUSICALC 2 allows up to 999 rows and up to 125 columns. Your total spreadsheet size can be up to 2500 cells (boxes). **BUSICALC 2** comes with a 56 page user-friendly manual that has step-by-step procedures and a quick reference section. It also has a nice low price!

		FALL SALE

JCT-1002™ 3.7 Megabytes of Hard Disk Ready for the Commodore 128 or Commodore 64

It's the Largest

Yes, the Skyles Electrics Works interfaced **JCT-1002** is the largest hard disk drive available for the **Commodore 64** and **Commodore 128**, at a price under $800. How large? 3.7 million characters of storage. 21 times larger than the 1541 disk drive. Turn it on to format the disk and the directory says 14400 blocks free! No, this is not an expensive hard disk, it is ready to plug into your **C-128** or **C-64** for less than $800. Physically it's about twice as tall as a 1541 disk drive, but it holds over 21 diskettes of information. Just think of it as twenty-one 1541s stacked into the space of two.

C-64 or C-128

It's the Fastest

Yes, the specially modified MERCURY interface makes this the fastest loading and saving hard disk drive available for the **C-64** or **C-128** computers. Over 12 times faster program and file loading than a 1541 disk drive. Four times as fast as a ***1541 FLASH!*** We made it this fast because, frankly, the advantages of a large disk memory almost disappear unless you have rapid access to the data.

It's the Most Useable

Visualize for a moment having over 3.7 million bytes of storage on one disk. Imagine never having to change a diskette again. Imagine over 20,000 mailing labels on one disk using Busidata and the **SEW/JCT-1002.** Imagine all the accounting data for a medium sized business on one data disk. Imagine all the programs you have ever developed or obtained from public domain on one disk. Imagine 125 full sized VIZAWRITER files (over 1800 pages) on one disk. These are but a few of the things that you could do with this disk drive. And at an amazingly low price!

It's the Least Expensive

Yes, on a price per character of storage basis, the Skyles Electric Works **JCT-1002** is the least expensive disk drive available for the C-128 and C-64.

It's the Most Enjoyable

Until one has experienced a large disk drive, one has not experienced real computing joy. Buy the **SEW/JCT-1002** hard disk drive system, plug it in, turn it on, and start sharing the joy. We furnish every thing you need to get started: disk drive, interface to **C-128** or **C-64,** instruction manual, and test/demo program. Order now and share the joy.

		FALL SALE
SEW/JCT-1002 Disk Drive System, C-128	**$899.00**	**799.00***
SEW/JCT-1002 Disk Drive System, C-64	**899.00**	**799.00***

LARGE DISK DRIVES

Commodore SFD-1001™

It's the largest

Yes, the Skyles Electric Works interfaced Commodore **SFD 1001** is the largest floppy disk drive available for the **Commodore 64** and **Commodore 128.** How large? 1.058 million characters of storage. 6.22 times larger than the 1541 Disk Drive. Turn it on, format a diskette and the directory says 4133 blocks free!! No, this is not an expensive hard disk, it is a 5¼ inch, double sided, floppy disk drive. It is the same physical size, shape, color as the Commodore 1541 disk drive. It looks like a 1541, but it stores over 1 million characters of programs and data. Just think of it as 6.22 1541s in one. And at an amazingly low price!

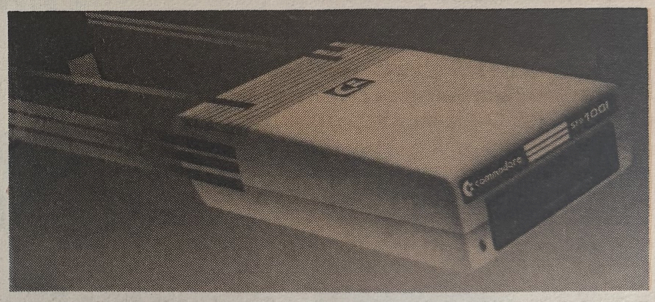
It's the Fastest

Yes, the specially modified ***QUICKSILVER***™ interface makes this fastest loading and saving floppy disk drive available for the **Commodore 64** and **Commodore 128.** Almost 8 times faster program and file loading than a 1541 disk drive. Twice as fast as a **1541 Flash!**. We made it this fast because, frankly, the advantages of a large disk memory almost disappear unless you have rapid access to the data.

C-64 or C-128

It's the Most Useable

Yes, having over a million bytes of storage on one disk opens a whole new world of usefulness. Imagine never having to change a disk again. Imagine over 6000 mailing labels on one disk using BUSIDATA and the **SEW/SFD 1001** disk drive. Imagine 34 full sized VIZAWRITER files (over 500 pages) on one disk. These are but a few of the things that you could do with this disk drive. And at an amazingly low price!



It's the Least Expensive

Yes, on a price per character of storage basis, the **SEW/SFD 1001** is the least expensive floppy disk drive available for the **Commodore 64** and **Commodore 128.**

It's the Most Enjoyable

Yes, until one has experienced a large disk drive, one has not experienced real computing joy. Buy the **SEW/SFD1001** floppy disk drive system, plug it in, turn it on and start sharing the joy. We furnish everything you need to get started: disk drive, interface to **Commodore 64,** Instruction manual, test/demo disk, and even your first blank program/data disk. Order now and share the joy.

		FALL SALE
SEW/SFD 1001 Disk Drive System, C-64	**$499.00**	**299.00***
SEW/SFD 1001 Disk Drive System, C128	**499.00**	**329.00***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

QUICKSILVER™

Is the fastest IEEE-488 Interface available for the **Commodore 64.** How fast? As fast as the external IEEE-488 device will allow. For example, a program or file will load over 5 to 7 times faster from a Commodore 4040 or 8050 disk drive as compared to a 1541 disk drive. ***QUICKSILVER*** loads 6 to 8 times faster than a serial MSD drive. When used with printers speed is only limited by the printer.

QUICKSILVER is transparent. ***QUICKSILVER*** does not occupy any program memory. Almost all programs are completely compatible with ***QUICKSILVER***. A word of caution, some IEEE disk drives have different formats, and 1541 formatted programs are not going to load. Some programs protect the disk by various operations in the 1541 disk memory. These programs will not load on non-1541 disk drives. However, for most uses ***QUICKSILVER*** is very quick and transparent.

QUICKSILVER is easy. Easy to plug into the cartridge port. Easy to plug additional cartridges into the built-in horizontal, cartridge port extender. Easy to locate your IEEE device within 6 feet of ***QUICKSILVER*** using the built-in 6 foot IEEE cable. Easy to select which device numbers you want ***QUICKSILVER*** to interface to the IEEE bus. Easy to use with almost all programs. Easy to buy, at an amazingly low price, from Skyles Electrics Works or your local dealer.

HARDWARE

DISK-O-PLEXER™

Share a 1541 disk drive with a friend. If not a friend, maybe a relative, co-worker or classmate. **Disk-O-Plexer** is a small box that shares one (or more) 1541 disk drives with 2 **C-64** or **C-128** computers. A simple, inexpensive, elegant, solution to the problem of sharing a 1541 disk drive with 2 **C-64**s or **C-128**s.

Disk-O-Plexer is a practical answer to the need for **C-64** or **C-128** local area networks in offices, in schools, and in homes. Practical because more than 2 computers sharing a disk drive suffer from slow speed of accessing the disk drive, high cost of the system and cabling, recurring system crashes, and complicated system operating protocols.

Disk-O-Plexer is easy to use. Locate two **C-64**s or **C-128**s within 9 feet of each other. Set **Disk-O-Plexer** within 3 feet of the 1541. Connect the farther **C-64** or **C-128** to **Disk-O-Plexer** with the furnished 2-meter serial cable. Connect the nearer **C-64** or **C-128** to **Disk-O-Plexer** with the disk cable. Connect the 1541 to **Disk-O-Plexer** with it's built-in cable. Plug in the furnished **Disk-O-Plexer** power supply. You now have your own mini local area network. **Disk-O-Plexer** is inexpensive and easy to buy from Skyles Electric Works or your local dealer.

Want to share a 1541 disk drive? Buy **Disk-O-Plexer** today.

Printer Power

It's the Lowest

Yes, the **HUSH 80CD**™ is the lowest priced printer ever for the **Commodore 64**...**$139.99.** We repeat **$139.99,** complete with a serial cable ready to plug into your **Commodore 64.** Oh yes, **$139.99** also includes your first roll of paper (over 100 sheets).

Don't let the low price fool you. This is no toy. This is a full 80 column (8½ inch paper), 80 characters per second (bidirectional) print speed, full **Commodore 64** keyboard graphics built in, dot graphics of 4800 dots per square inch printer. We at Skyles Electric Works have not in the past considered printers an appropriate mail order product, but the **HUSH 80CD** breaks all the rules.

Carton (6 rolls) Thermal Paper	**35.99**	**29.99***

1541 Disk Alignment Kit

Let's face it, the 1541 disk drive does not stay in alignment. Misalignment means that the disk only loads commercial programs when it is first turned on, or when it is cold, "I need a larger fan", or only loads programs recently recorded. It is expensive to have your disk aligned. No more if you have access to a high impedance voltmeter (30Kohm/volt), 1 hour's time, and a Skyles Electric Works **1541 Disk Maintenance Kit.**

A SEW **Disk Maintenance Kit** consist of: 1) Alignment reference disk, 2) Test and alignment program disk, 3) Video detector, 4) Complete alignment instructions, 5) *1541 Maintenance Guide* by M. Peltier. All this for less than the cost of a single 1541 disk alignment from most dealers.

Order a **1541 DAK** from Skyles Electric Works or your local dealer today.

		FALL SALE
1541 DAK C-128, C-64, Voltmeter	**$39.95**	**29.95***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

BLITZ!™

NOW SHOWING AT COMMODORE DEALERS

If your programs are slow, BLITZ!™ them

It's Spectacular

Bob has discovered a spectacular compiler for the **Commodore 64** and the **Commodore 128** that he calls ***BLITZ!***

It's Fast

BLITZ! is faster than *PET SPEED,* faster than any other Commodore compiler that has come down the pike. Your ***BLITZ!***-compiled program will run from *five to 20 times* faster than it did before you blitzed it.

C-64 or C-128

It Translates

This disk program translates your slow BASIC programs into a much, much faster code. The ***BLITZ!*** compiler significantly improves the performance of your BASIC routines. It reads the entire program, reduces that program's size by deciding which operations need to only run once, interprets the operations, and then re-writes the program into its own special P-code.

It's Protective

For more advanced programmers, the ***BLITZ!*** compiler offers another benefit besides speed. It provides an almost infinite number of ways to add protection to your programs, because a compiled program is not readable. So security is inherent in the re-writing!

It's a Treasure

Using this compiler, you can now create a string of BASIC programs such that one automatically loads the next. You can also pass information from one program to another. You will find the ***BLITZ!*** compiler a treasured tool in your programming kit.

It's Popular

Reviewers and users have heaped the following praise on the ***BLITZ!:*** "The ***BLITZ*** basic compiler is a dream come true for BASIC programmers." Compute!'s Gazette Jan 1985 "worth its weight in gold." TPUG Mar. 1985. "Wonderful" "Fantastic" "I can't imagine programming without it" User comments. It is even more popular with professional programmers. Many commercial programs now say "***BLITZ!***" when they are listed. The ultimate accolade for ***BLITZ!***.

		FALL SALE

2 for 1 MONITOR CABLE™ for the Commodore 128

Commodore's Goof!!

Every new Commodore computer usually contains some small oversight or goof. At Commodore these are known as "oops!". The Commodore 128 is no exception!! There is no practical way to go between the 40 and 80 column modes of operation with a single standard monitor. Commodore's answer is that you buy 2 monitors and 2 cables, or buy the rather expensive C-1902 color monitor.

Skyles' Secret!!

We love Commodore's goofs!! We look forward with anticipation to each new Commodore Computer, eagerly awaiting a new crop of goofs. We correct Commodore's goofs and oops! for fun and profit. The Skyles Electric Works **2 for 1 Monitor Cable** is our first oops! correction for the C-128.

COMMODORE 128 EXCLUSIVE!

Saves Monitors

The **2 for 1 Monitor Cable** allows all composite video monitors, the standard type, to be used with the Commodore 128 computer *in all modes of the C-128 operation.* The **2 for 1 Monitor Cable** eliminates the necessity to manually unplug and plug different monitor cables when you go between 40 and 80 columns modes of the C-128 computer. Don't throw out your present green, amber or color monitor, buy a **2 for 1 Monitor Cable.**

Fabulous Features

- Works with all modes of the Commodore 128; C-64, C-128/40, C-128/80, C/PM/40, and C/PM/80.
- Easy access gold contact switching between modes, no cables to plug-unplug.
- Furnishes a SOUND input to the monitor in all modes of the Commodore 128 operation.
- Works with all normal (composite video input) monitors.
- Works with C-1701, C-1702, Amdek, BMC, NAP, etc. monitors.
- Works with all normal (composite video input) green and amber monitors.
- Easy installation, plug in three plugs once.
- One year parts and labor guarantee.

Saves Money

Available now for a small fraction of the cost of new monitor.

		FALL SALE
2 for 1 Monitor Cable, C-128	**$29.95**	**24.95***

So many cartridges, so little space . . .

Skyles Electric Works to the rescue, with our **2+1**™ and **4+1**™ expansion boards for the C-64. Briefly the **2+1** gives you 2 vertical and 1 horizontal fully switchable cartridge ports. The **4+1** continues the tradition with 4 vertical and 1 horizontal cartridge ports. See the inside front cover for more details.

		FALL SALE
Skyles 2+1 Expansion Bd. C-64	**$49.95**	**39.95***
Skyles 4+1 Expansion Bd. C-128, C-64	**$89.95**	**69.95***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

Victree™

Created for COMMODORE 64 and VIC-20 users by a programmer named Robin.

This remarkable device lets you branch out on your versatile Commodore machines. The **Victree** makes BASIC basic with its coordinated hardware and software package. Access your disk and debug your programs faster. The **Victree** contains the most convenient versatile programmer's aid package that you can get in personal computers today.

42 Added Commands

The **Victree** lets you take fuller advantage of the Disk Operating System in your 1541 Disk Drive. It gives you key BASIC disk and file commands that you could not otherwise get without purchasing a **Commodore 128**. Here's a small sample:

The DIR command immediately reads the disk directory while leaving the computer's memory completely untouched, and without disturbing whatever program you're working on.

Additional **Commodore 128** disk commands are: CHAIN, EXECUTE, MERGE, SEND, USE, CONCAT, DOPEN, DCLOSE, RECORD, HEADER, COLLECT, BACKUP, COPY, APPEND, DSAVE, DLOAD, DIRectory, RENAME, SCRATCH, CATALOG, INITialize. (**Victree** only)

Other Popular Features

Victree has 15 commands that permit the greatest program writing and fixing ease. For writing, the toolkit of commands includes: AUTO, DELETE, RENUMBER, MERGE, LCOPY, LMOVE, PRINT USING, FIND, CHANGE, PAGE, HELP, DUMP, TRACE, KILL, KILL SAVE.

The VICTREE

Even has a very simple test editor that allows brief documents to be entered and printed out, a "PRINT USING" command and a switch that turns off the cartridge and restores all memory.

		FALL SALE

COMMODORE 128 COMPATIBLE

PrintCable™

The Skyles Electric Works **PrintCable** interfaces your C-64 or C-128 or VIC to all popular printers, besides offering an absolutely amazing, lowest cost, centronics style, parallel interface, when used with VICTREE, Printer Buffer,™ and many programs. A partial list of programs that appear in this catalogue that can use the **PrintCable** directly without VICTREE or Printer Buffer includes:

BUSIDATA 64, BUSIDATA 128 . . . . . see page 7
BUSICALC 2, 3 . . . . . see pages 6, 7
MIKRO, ARGO . . . . . see page 10
Instant Recall, Word Perfect . . . . . see page 6
Superbase 64, VIZAWRITER . . . . . see page 11

A printer interface at an amazing low price.

		FALL SALE
PrintCable 64, C-64, VIC 20 (specify)	**$29.95**	**19.95***
PrintCable 64 (when purch. with above programs)	**19.95**	**14.95***

Printer/Buffer™

Skyles Electric Works now offers an 18,500 character buffer memory (that's 8 to 10 pages) to complement PrintCable. Printer buffers normally cost hundreds of dollars. Not **Printer/Buffer**! Why? Because we use the hidden memory in the C-64. Most programs use less than half of the available memory of the C-64, some use much more, **Printer/Buffer** may not work with some of them. **Printer/Buffer** contains a program to interface most programs to Centronics style printers via the PrintCable.

Printer/Buffer is the cheap answer for buffering and interfacing your printer.

		FALL SALE
Printer/Buffer, C-64, Disk	**$29.95**	**19.95***
Printer/Buffer-PrintCable comb.	**59.90**	**34.95***

PROGRAMMERS

FLOWCHARTER™

Every once in a while Skyles Electric Works discovers a truly unique program that is worth it's weight in gold to a small number of **C-64** and **C-128** users. **FLOWCHARTER** is an invaluable tool for the truly professional BASIC programmer. An outstanding educational aid for those who wish to improve their programming skills.

FLOWCHARTER prints out a flowchart of any **C-64** BASIC program. If you don't know how absolutely essential a flowchart is for professional program design, do not read any further. **FLOWCHARTER** prints out a flow to the screen or external printer.

We don't normally mention a program not available for delivery. **FLOWCHARTER 64** is available now, **FLOWCHARTER 128** will be available in late November 1985. **FLOWCHARTER** for the professional/serious BASIC programmer.

Coming for C-128

		FALL SALE

FLOWCHARTER 64, C-64, Disk	**59.95**	**49.95***

Arrow™

Have you been spending too much time with your tape recorder waiting for your programs to load? Skyles Electric Works can help.

Enter the Arrow

This cartridge can load programs off cassette at about eight times the normal speed. It can re-record a program once at up to eight times the density on tape. This means that you can get 200 kbytes of programs on a single C-20 tape. In the long run, you will be able to put 10 tapes into one. The **ARROW** cartridge will pay for itself in the tape and the vast amount of loading time it saves.

		FALL SALE
ARROW AR20 (VIC20), AR64 (C-64)	**$49.95**	**29.95***
ARAS 20 (VIC-20), ARAS 64 (CBM-64)	**86.95**	**49.95***

*There is an additional $4.50 U.S. and Canada, $15.00 Europe and Asia, shipping charge per order. California residents add sales tax.

1541 FLASH!™

The new Skyles Electric Works ***1541 Flash!*** loads programs and files to your **Commodore 64** or **Commodore 128** *three times faster* than an unenhanced Commodore disk drive can. ***1541 Flash!*** saves programs 20 to 50 percent faster. ***1541 Flash!*** formats a diskette in 25 seconds, *a real flash!!*

It gives your 1541 disk drive the speed of much more expensive drives. The Skyles Electric Works ***1541 Flash!*** is one of the most exciting time-saving devices we've ever seen.

It's Permanent

The ***Flash!*** is a permanent firmware installation in your **Commodore 64** or **Commodore 128** and 1541 disk drive.

C-64 or C-128

It's Transparent

Best of all, the ***1541 Flash!*** is transparent. Computer operations all remain unaffected as it speeds up every disk-related function. And there is nothing new to learn for the ***Flash!*** Once it's in, just watch it go.

It's Popular

Reviewers and users have heaped the following praise on the ***1541 Flash!***: "The ***1541 Flash!*** is the best!"...The Northwest Users Guide; "...I'm very pleased with its operation and won't hesitate to recommend it..." RUN; "Having used ***1541 Flash!*** for several days already I can't bear to go back to a slow 1541. It's amazing how quickly you can get spoiled by a luxury like this." Compute!'s Gazette; "...What you have done with the kit is amazing..." "IT WORKS GREAT!!!" "This is an outstanding product!" "(which works like the proverbial charm)"...User letters.

It's Special

We have special versions of the ***1541 Flash!*** for the **SX-64** and the **Commodore 128** in all but C/PM modes. The **SX-64** ***Flash!*** fits neatly inside the **SX-64**, unless you wish the two drive version, in which case we add an external cable to the 1541 second drive. The ***C-128 Flash!*** adds three small plug-in assemblies to the **C-128,** one external and two internal. If you are interested in ***1541 Flash!*** for different disk drives see the accompanying box.

C-64 or C-128

It's Flexible

And it's flexible. The ***1541 Flash!*** adds over 50 extra commands for the Commodore 64 user. These include a built-in DOS wedge, NOTEPAD, and FLASHMON! machine language monitor. For many users the Easy Everyday Commands simplify disk operations and are available in all versions of ***1541 Flash!.***

It's Serious

But if you are really serious about programming, the ***1541 Flash!*** is a gold mine. The C-64, SX-64, and C-128/C-64 versions of the ***1541 Flash!*** contain FLASHMON!, a built in machine language monitor. Additionally the manual will show you how to write software allowing data transfers from the disk drive at speeds up to 6 times faster.

It's Easy

Installation of the ***1541 Flash!*** consists of plugging small assemblies inside the **Commodore 64** or **Commodore 128** and two small assemblies plug into the Commodore 1541. Except for a small percentage of **Commodore 64s,** no soldering is required. Assembly instructions include detailed pictures and drawings. And installation is—well, a flash.

It's Available

Call Skyles Electric Works to place your order or to get more info on the ***1541 Flash!*** Hurry up, though. They may be gone before you know it.

FLASH is Expanding

In response to user demand we have expanded the ***FLASH!*** to include the Commodore SFD-1001, SKYLES ELECTRIC WORKS JCT-1002, and the MSD disk drives. We have named this new family of transparent, high speed Interfaces ***QUICKSILVER/MERCURY.***™ ***QUICKSILVER*** is a high speed, special purpose version of a C-64/C-128 IEEE-488 interface. ***MERCURY*** is a high speed interface for the 1571 to the C-64 or C-128. ***QUICKSILVER*** (MSD FLASH!) also works even faster (5 to 7 times the 1541 speed) with the Commodore 2040, 4040, 8050, 8250, 9060, and 9090 disk drives. We even have a ***QUICKSILVER*** for the Commodore SFD 1001 that is almost 8 times faster loading than a 1541 disk drive. Now that's fast.

For details see page 4.

And for really outstanding disk drive performance see page 5 for the Commodore SFD 1001 Disk Drive and the JCT 1002 Hard Disk Drive Systems. Consider, 6 to 21 times the storage and over 8 to 15 times the speed of Commodore 1541, in a package that is not much larger than the Commodore 1541.

Speed up your alternate disk drive! with ***QUICKSILVER/ MERCURY.***

		FALL SALE

Dear Commodore User,

I started Skyles Electric Works over eight years ago to help enhance the potential of **Commodore** computers and to make that potential available to you the customer at the **lowest possible prices.** Today we are the largest independent producer and marketer of new and unique Commodore related equipment and software.

All products on these pages have been designed or adapted specifically for the Commodore 128/Commodore 64/Commodore 64C computers and AMIGA. This catalogue shows our spectacular range of new and unique hardware and software to enhance your Commodore computer (a wider range than Commodore itself offers). All being offered at, not to be repeated, **low, low FALL SALE prices and a full credit coupon** on all software. If you want **Commodore** support, this is the place to look and now is the time to buy. We want your order!

We're here to help you. Just relax and enjoy your computer. And enjoy the catalogue.

—Bob Skyles

P.S. Take advantage of our **low low FALL SALE prices,** and our 2 for 1 coupon. Order today!!
P.P.S. Please see top of next column for an amazing offer.

How to Order

ORDER BY MAIL. You may use the Order Form enclosed in this catalogue or write a personal letter giving product name, model number and quantity.

ORDER BY TELEPHONE—TOLL FREE—Any time—9 hours a day—5 days a week. Use our toll-free number **1-800-227-9998** for your Skyles Electric Works catalogue orders chargeable to your MasterCard or VISA card. From Alaska, California, and foreign countries dial **1-415-965-1735** and, to help pay the phone charges, we will give you $1.00 off each telephone order that you place.

TERMS are payment with order. Please include your check, bank draft money order or use your MasterCard or VISA on orders over $50.00. Sorry we do not accept C.O.D. orders.

SHIPPING TIME. We will process your order immediately upon receipt. We normally ship priority mail or UPS. If we cannot ship within 7 days we will notify you of the expected delay. Your order should reach you in less than 10 days.

CUSTOMER SERVICE. For inquiries and other customer service calls, our telephone number is **1-415-965-1735.** Please telephone between the hours of 9:00 AM and 6:00 PM Pacific Time, Monday through Friday.

INTERNATIONAL ORDERS. Send United States funds for merchandise plus enough to cover shipping and handling.

PRICES in this catalogue are effective December 22, 1986 and subject to change without notice.

"Give me some space."

If you need some space where you are working, try our new **2 + 1**™ Expansion board. It lets you use the ***QUICKSILVER*** and three program development cartridges such as VicTree, MIKRO and Powermon, or three game cartridges.

We also carry a **4 + 1**™ version that allows up to 5 cartridges to be plugged in to your **Commodore 128/Commodore 64/Commodore 64C**—all at once! Switching on the expansion board lets you choose power and selection for any cartridge.

The board gives you three connectors to wear out, so it saves your computer's cartridge port.

The Expansion Board is physically configured to allow a CPM cartridge or ***QUICKSILVER*** interface to slip in horizontally.

TaxWare™ now available for Commodore 128

It's Available
TaxWare, the most comprehensive, easy to use, all year around record keeping and tax preparation system available for the **Commodore 64**, is now available for the **Commodore 128**. Better yet, both the improved **C-64** and **C-128** versions of this popular package are available in one comprehensive package.

It's Faster
Both versions of **TaxWare** have been speeded up using ***BLITZ 64*** and ***BLITZ! 128*** compilers. To the best of our knowledge **TaxWare** is the fastest **C-64** and **C-128** tax preparation system available anywhere.

It's Comprehensive
TaxWare handles itemized deductions, income averaging, dividends, stocks, self-employment, rents, royalties, childcare, marriage deductions and much, much more. **TaxWare** includes forms 1040, 2442, and Schedules A, B, C, D, E, G, and W.

C-64 or C-128

TaxWare stores and calculates all in one program, eliminating the need for separate database programs to store some tax items or forms.

It's Easy
HELP SCREENS are available at the touch of a button from anywhere within the **TaxWare** program. At the touch of a button, many forms are printed out in I.R.S. approved format, for direct submission. We can't make the payment any easier, but the preparation couldn't be easier with **TaxWare**.

It's Available Now
TaxWare is available now from Skyles Electric Works or your favorite local dealer. Call us at **1-800-227-9998** or **1-415-965-1735** and we will rush a **TaxWare** to you by return mail.

DRUM MACHINE

Convert your Commodore 64, 64C, and 128 computer to a digital drum machine with RHYTHM KING.

RHYTHM KING is the latest offering from **Supersoft** of England. **RHYTHM KING** turns your **C-64, C-64C** and **C-128** into a digital drum machine!! **Supersoft** digitized real drums using the famous **MICROVOX PRO** digital sampler. The results are unbelievably realistic. Is it live or is it **RHYTHM KING??**

The **RHYTHM KING** system comes complete with an output cartridge, software on disk and an easy to use 16 page manual. Presently **RHYTHM KING** has 2 drum sets built in, with more to come. Each drum kit has 8 different percussion instruments. With **RHYTHM KING** you may play up to 3 different drums simultaneously.

RHYTHM KING features menu driven software. You select the menu options using the function keys and the return key. Or you may use a joystick with a fire button. On turn on you are presented with a system menu. Select "Live Play" and use keys 1 through 8 to play your drum kit, live!!

RHYTHM KING offers complete "Pattern" writing and editing features.

> You may write "patterns of up to 24 bars. You may have up to 32 notes per bar. Each note may contain up to 64 steps. Up to 64 different patterns may be linked together into a "song."

After the patterns are created using the "Pattern Editor" they may be combined into a "Song" using the "Song Editor." The Song Editor features:

> A pattern in a song may be repeated up to 255 times. You may change the recorded pattern tempo at the time you insert it into a song. Each song may step through up to 85 patterns. Songs may be linked together to form "Mega-songs" of up to 255 pattern steps. Each song or Mega-song is limited to 7,500 steps in the C-64 and C-64C or 18,000 steps in the C-128.

To polish off your efforts **RHYTHM KING** has a "Recording Studio" that features; Play Song, Rename Song, Copy Song, Save Song, Erase Song, Offset, and Reset. Offset allows you to change the tempo of your song from –99% (much slower) to +99% (almost twice as fast).

RHYTHM KING comes ready to run. A truly outstanding drum machine.

The Price is right
